

TEPTA
LIGHTING

TEPTA LIGHTING

Since 1991, our ever-expanding team of experts have been providing comprehensive lighting consultancy to architects, designers, interior designers, electrical engineers and end-users, responding to an array of needs including project design, supervision and product selection. Representing over 30 leading international lighting companies in Turkey, we have a selection of 30.000 products within the technical and decorative range. Striking samples from this wide spectrum are displayed in our four-storey showroom in Levent, Nispetiye. We offer both imported and custom-made solutions for lighting projects in response to technical, aesthetics and economical requirements. With more than 25 years of experience in the field, we offer our services both on the national and international platform.

torremato

Since 1994, this workshop has offered fully hand-crafted products brought to life through an haute-couture sensibility and application. Integrating artistic values with aesthetics and quality, each of these lighting objects can be seen as a work of art in its own right. With silk as the predominant material, textures and forms that seem quite simple are in fact the result of a highly complex and laborious process and are held in great esteem by the expert eye.

LASVIT

A global design brand which originated in the Czech Republic. Lasvit's products and projects are presented in an exclusively designated section within TEPTA. Collaborating with master designers to shape the traditional glass art of the geography it has inhabited for over a century, the company creates contemporary design classics. Offering a wide spectrum of products ranging from singular products to custom-made glass installations for prestige venues, Lasvit also has an outstanding selection of architectural glass partitions designed by Ross Lovegrove. Among the designers the company has so far worked with are Nendo, Arik Levy, Marteen Bas, Campana Brothers, Daniel Libeskind, Borek Sipek, Michael Young and DeForm.

Founded in 1922 by Bernard Forestier, the French brand has been producing visually striking, energy saving lighting models for the last 96 years. Modern pendant lights, desk lamps and all other fittings are hand made in a poetic form, using raw and innovative materials.

Forestier - Bamboo Light
Designer : Arik Levy

Established in 1910, Roger Pradier not only offers a classical collection but also produces original designs for simple, elegant and contemporary spaces. With a crew of only 50 employees, the brand has the production capacity for 80.000 products a year, making each product available in 26 different colours. With their exterior lighting products, they offer a warranty period of 25 years to prevent oxidation. Benefiting from an excellent analysis of changing technologies and requirements, the brand integrates architectural products and hand-made specimen of cultural heritage with an impeccable choice of materials.

SIMES

luce per l'architettura

Founded in 1973, SIMES is a leading company in exterior lighting design as a result of their R&D activities and investments made in LED technology over the last 13 years. Using innovative materials like wood and concrete for simple and effective lighting solutions, the company changed the rules of aesthetics in exterior lighting with their collection "Material Expressions" launched in 2016. While "Ghost", a very special product by Marc Sadler, presents architects with a brand new dimension in design, the "Wood" series designed by Matteo Thun integrates wood - in its most natural state - with elements of exterior lighting. Klaus Begasse is also among the designers whose work won awards for the company.

SHOWROOM

TEPTA Lighting attributes great value to culture and arts.

A dedicated supporter of many cultural and artistic projects each year, TEPTA presented the exhibition “Day, Light, Night” to commemorate the 25th anniversary of its foundation in 2016. The exhibition was held at Istanbul Modern and was the first exhibition in Turkey that was solely dedicated to light. It was viewed by nearly 200 thousand people in 4 months. The bilingual book accompanying the exhibition was the first book in Turkey that offered exclusive coverage on the topic of light. 1000 copies were distributed to architects, designers and artists. Also two projects, “Darzana: Two Arsenals, One Vessel” (2016) and “Shift” (2018) coordinated by the Istanbul Foundation of Culture and Arts, and exhibited by the Turkish Pavillion at the Venice Architecture Biennale, were illuminated by TEPTA. The company has also sponsors the lighting of Istanbul Modern since its very foundation.

TEPTA projects can be accessed via the QR code below.
